PROPERTY MANAGEMENT

Protect your residents and
buildings with video analytics

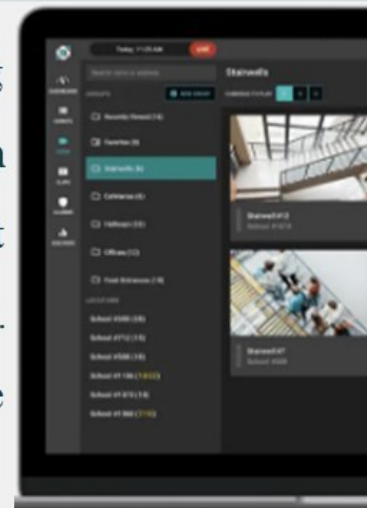

**MONITOR WHO ENTERS AND EXITS YOUR BUILDING,
RECORD LICENSE PLATES OF CARS IN YOUR PARKING
LOTS, AND PROVIDE EVIDENCE TO LAW ENFORCEMENT
WHEN NECESSARY WITH EASE.**

The difference is in the data.

Solink interprets and clarifies the data created by your locations' systems, and then pairs each moment with security camera video footage to give you the full context for each event. Solink will highlight unusual activity and outlying events, making it easy for you to act on what matters most.

Health checks and camera alerts: One of the most frustrating things that can happen to cameras in schools is having them go down without knowing. This prevents you from viewing any incidents that happen during the time that the camera may not have been functioning. Solink regularly monitors customer QNAPs and camera health to make sure your cameras stay online and video is being recorded.

Turn loss prevention into a profit center

Increase your revenue with Solink's smart analytics & video insights

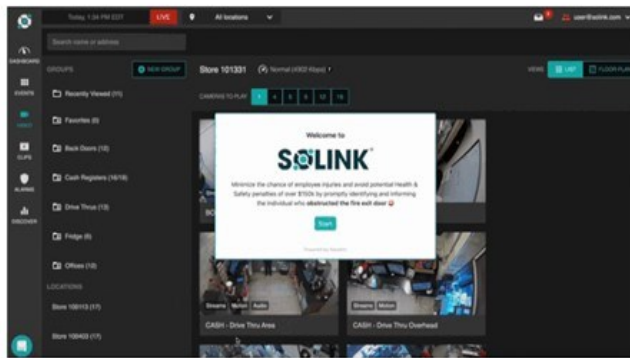

Solink can be the hub of 1 or 1000+ sites.

Our platform is ready to take on any challenge. There is no limit to the number of sites we can connect to, which gives you remote, mobile access to each store's data and security cameras anytime, anywhere. Solink eliminates the need for multiple software subscriptions; work smarter with Solink.

Tools that connect all of your systems and locations

Solink's goal is to integrate with your existing video surveillance infrastructure to allow for a cost-effective and easy installation or upgrade. Our cloud video surveillance platform integrates with property management systems and security camera systems, making Solink the all-in-one video analytics platform. That saves you time and money.

Complete visibility of all your properties

FIND WHAT YOU'RE LOOKING FOR IN SECONDS.

Save hours sifting through video to find what your looking for in seconds with **motion search** in our **self-guided tour**.

REMOTE CAMERA ACCESS

Monitor your parking lots, public areas, pools after hours, and access points to all buildings from anywhere. Audit the safety and security of all your properties with minimum on-site visits.

MOTION SEARCH

Guest slip in the pool area? People illegally dumping their old furniture? Quickly search through recorded surveillance video by using Solink's Motion Search feature. Simply draw in the area that the event occurred and within seconds find the exact moment the incident takes place. You don't need to spend hours watching video surveillance footage. Solink lets you get back to providing your customers the service that keeps them coming back.

SAVE AND SHARE

Solink's Save and Share feature allows you to do just that—save or share important data and video in a matter of seconds. You no longer need USB sticks to share videos. You can quickly email the action item to management for review or directly to law enforcement/insurance to assist with an investigation.
