

Solutions

EDUCATION

Improve student, faculty, staff and campus safety with Solink's video security and analytics.

AS THE HUB OF YOUR SCHOOL'S CONNECTED SYSTEMS, SOLINK GIVES YOU VISIBILITY AND INSIGHT INTO YOUR SCHOOL'S OPERATIONS AND SECURITY.

Solink's video analytics and security for education campuses makes it easy to create a safe, secure and healthy learning environment for every level of education – from pre-k through university. We can also reduce operating and maintenance costs and, with no servers to maintain, it is a cost-effective solution that scales with your needs.

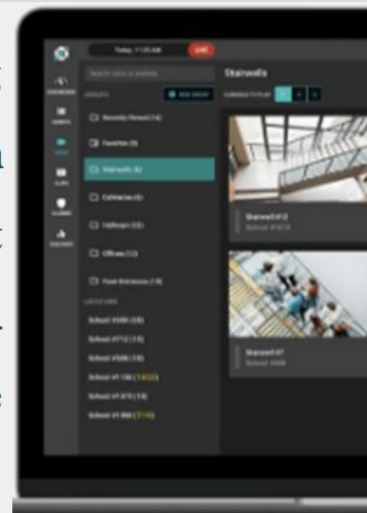

Whether it's one campus or an entire school district, Solink meets your security needs.

The difference is in the data.

Solink interprets and clarifies the data created by your locations' systems, and then pairs each moment with security camera video footage to give you the full context for each event. Solink will highlight unusual activity and outlying events, making it easy for you to act on what matters most.

Health checks and camera alerts: One of the most frustrating things that can happen to cameras in schools is having them go down without knowing. This prevents you from viewing any incidents that happen during the time that the camera may not have been functioning. Solink regularly monitors customer QNAPs and camera health to make sure your cameras stay online and video is being recorded.

Turn loss prevention into a profit center

Increase your revenue with Solink's smart analytics & video insights

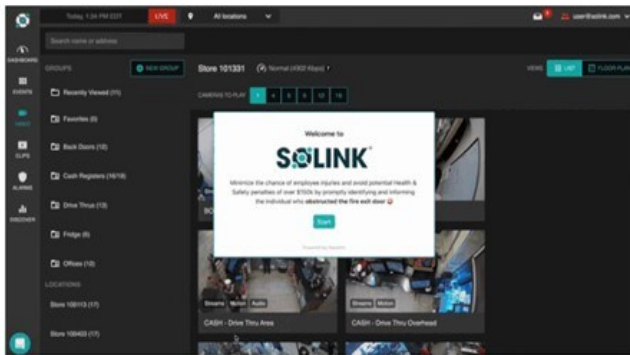

Solink can be the hub of 1 or 1000+ sites.

Our platform is ready to take on any challenge. There is no limit to the number of sites we can connect to, which gives you remote, mobile access to each store's data and security cameras anytime, anywhere. Solink eliminates the need for multiple software subscriptions; work smarter with Solink.

Tools that connect all of your systems and locations

Solink's goal is to integrate with your existing video surveillance infrastructure to allow for a cost-effective and easy installation or upgrade. Our cloud video surveillance platform integrates with property management systems and security camera systems, making Solink the all-in-one video analytics platform. That saves you time and money.

FIND WHAT YOU'RE LOOKING FOR IN SECONDS.

Save hours sifting through video to find what your looking for in seconds with **motion search** in our **self-guided tour**.

UNLIMITED USERS

Give access to as many users as you want with no extra cost. Solink allows you to control privileges like giving someone access only to exterior cameras, or granting temporary access.

REMOTE MONITORING

Solink is available 24/7 on the web and your mobile devices giving you access to all your campuses from anywhere.

EASY INTEGRATIONS

Solink allows you to use your existing cameras, nvr, access controls, RFID, etc, so there is no need to upgrade, maximizing your budget.
