WAREHOUSE

Giving you total visibility into your warehouse, garage, and headquarters, Solink is your security multi-tool.

SOLINK IS A SUBSCRIPTION-BASED SOFTWARE THAT MULTI-TASKS AS HARD AS YOU DO.

Solink **connects with your video cameras, keypads, and other login systems.** It then creates a dashboard of clips that you can search by **time, date, key code, motion, and crewman.** Solink gives you total visibility into your facility anytime, from anywhere. It's the foreman on your team who never sleeps.

The difference is in the data.

Solink interprets and clarifies the data created by your locations' systems, and then pairs each moment with security camera video footage to give you the full context for each event. Solink will highlight unusual activity and outlying events, making it easy for you to act on what matters most.

Holistic asset protection

Uncover internal, external, and operational issues within minutes.

Automate your investigations

Integrate POS data, case management, exception-based reporting, and video analytics with Solink.
